## Response to Arguments

Examiner Minh-Chau is no longer assigned to the present patent application.

This application is now assigned to Examiner Chirag Patel. In examining this patent application, full faith and credit has been given to the search and action of the previous examiner. MPEP § 719.05.

Applicant's arguments filed on May 23, 2005 have been fully considered but they are not persuasive. A discussion of Junkins (US 6,493,717) is discussed below.

### Applicant arguments:

Junkin fails to provide any disclosure that is directed to a centralized server that maps the user to at least one appropriate database based on the user request and at least one database connection definition.

#### Examiner Response:

Junkin discloses per column 6 lines 27-38 "FIG. 1 illustrates a computer system 10 in which a client computer 12a (or 12b or 12c) communicates with a DataCrawler application server 14 that communicates with a database server 16a (or 16b). The DataCrawler application server 14 is responsible for retrieving information from a database system at the database server, formatting the information according to a Hypertext Markup Language ("HTML") format, and sending the information to the client computer 12a where Web browser software running on the client computer 12a can

display the information. A display of representative information is shown in FIG. 2, generally at 100."

The Data Crawler application server is the centralized server that communites with a database. The user request and at least one database connection definition is based on the HTML format mentioned above and discussed per (Col 9 lines 6-14, Col 9 lines 40- Col 10 line 29)

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Junkin (US 6,493,717)

Regarding claim 1, Junkin teaches a method for implementing database connection mapping for connecting a user to at least one database in a reporting system, comprising the steps of:

enabling a user to submit a user identification input and a user request to a

Application/Control Number: 09/883,301

Art Unit: 2141

reporting system (Col 28 L. 54-63),

identifying the user based on user identification input (Col. 22, L. 13-17 and Col. 9, L. 57-60) and

controlling access to at least one database through a centralized server wherein the centralized sewer maps the user to at least one appropriate database based on the user request and at least one database connection definition (Junkin teaches the Datacrawler system controls access to databases from users. All requests of users would be generated to HTML pages. Moreover a Program, which is an application process of the Datacrawler system, determines a database must be accessed by the user based the HTML content) (Co1. 9, L. 6-14, L. 40-67 and Col. 10, L. 1-29).

Regarding claim 2, Junkin teaches the method of claim 1 wherein the database connection definition comprises a data source name and a set of properties for establishing a database connection to at least one database (Col. 6, L. 51-56).

Regarding claim 3, Junkin teaches the method of claim 2 wherein the data source name comprises information for locating and logging into a database (Col. 23, L. 59-61 and Col. 24, 31-34, and Col. 28, L. 33-40).

Regarding claim 4, Junkin teaches the method of claim 2 wherein the database connection comprises a physical open database connectivity connection to a

Application/Control Number: 09/883,301

Art Unit: 2141

database (Junkin teaches ODBC for adding a new data type mapping. In other word, ODBC is used to connect a database) (Col. 32, L. 1-7).

Regarding claim 5, the method of claim 1 wherein the user is associated with a group of users where each user of the group is mapped to a database connection via a database login (Col. 29, L. 47-59 and L. 30, 1 1-18).

Regarding claim 6, the method of claim 1 further comprising the step of load balancing query volume associated with the at least one database (Junkin teaches the system creates SQL queries to be sent to an SQL database.

Moreover, there are many SQL databases into the end-user databases.

Therefore, it implies to have a number of queries would be created to be sent to those databases) (Col. 8, L. 36-38 and Col. 45-47).

Claims 7-12 list all the same elements of claims 1-6, but in system form rather than method form. Therefore, the supporting rationale of the rejection to claims 1-6 applies equally as well to claims 7-12.

Claims 13-18 list all the same elements of claims 1-6, but in processor-readable medium form rather than method form. Therefore, the supporting rationale of the rejection to claims 1-6 applies equally as well to claims 13-18.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chirag Patel whose telephone number is (571) 272-7966. The examiner can normally be reached on Monday-Friday from 7:30AM to 4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on (571) 272-3880. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for
